

FYC Sailing Certification

FYC and Auxiliary members are eligible to participate in the FYC J22 fleet program.

To be eligible to rent an FYC J22, the club will be using US Sailing 101 Keel Boat certification.

If you are a beginner with little or no sailing experience, a Basic Sailing course will be offered at the club. The course will be in classroom as well as on the water training.

If you are an experienced sailor, to be certified to use a FYC J22 club boat, you will have to do a test sail with a Sailing committee member.

The test for sailors to be certified will be on the water:

- 1) Preparation and rigging
- 2) Leaving the mooring safely and returning safely
- 3) Starting, Stopping and speed control
- 4) Getting out of the irons
- 5) Points of Sail
 - a. Tacking
 - b. Jibing
 - c. Sailing Upwind and downwind
 - d. Sail Trim
- 6) Overboard rescue procedures
- 7) Awareness outside the boat
- 8) Navigation to and from the harbor
- 9) Securing the boat and unrigging

Once a sailor has been certified by a sailing committee member, the FYC member will be able to rent an FYC J22 through the rental program.
